

"Create your own Controller" DX1 Now Available from Think.Geek.com

Ergodex and Leading E-Commerce Site Announce DX1 Reseller Agreement

Mountain View, CA. 7 November 2005. ThinkGeek.com, the leading e-commerce site for the technologically obsessed, and Ergodex, a leading supplier of input devices, announced today that ThinkGeek has become an authorized reseller for the Ergodex DX1 Input System.

"The DX1 stands out as one of the most innovative and necessary new products of 2005. This is the ultimate input system for the surefire techie," said Scott Smith, co-founder of ThinkGeek.com. "The DX1 is a revolutionary new input device. You start with a Pad the size of a mouse pad. Then, all you do is stick the keys where you want them and tell your computer what you want the keys to do, anything from a single key to a string of commands."

"ThinkGeek stands out as a special place where innovators go to learn about and acquire new technologies and products, such as the DX1. In its first day on ThinkGeek.com, the DX1 was the number 5 best selling item. ThinkGeek understands how to spot critical new technologies and bring them to early adopters and the rest of the market," said Larry Kelly, CEO of Ergodex. "It's great to see wonderful new technologies available through a leading edge reseller."

Keyboard technology, originally designed for simple alphanumeric entry tasks, has not advanced much since its beginnings in typewriters, over 100 years ago. Modern software, such as PC gaming and high-end business and professional productivity apps (digital content creation, engineering, video, etc.), is more demanding, especially for tasks such as navigating complicated command menus and directing character motion in entertainment and gaming software. The range of macro capability supported by the DX1 provides the breakthrough that eliminates the need to navigate confusing command structures. Because the DX1 keys are movable and micro-positionable, directing character motion in entertainment software is more natural, more convenient, and less tiring.

Introduced at the Game Developers Conference this spring, the DX1 was given a "Must Have" award by Tom's Hardware Guide. For more on the DX1 Input System, visit www.ergodex.com. For ordering the DX1, visit www.thinkgeek.com.

ABOUT ERGODEX

Founded in 2000, Ergodex provides customers with dramatically improved ways of interacting with computers and other equipment. Ergodex technology helps users gain the upper hand in controlling increasingly complex application software. The new Ergodex Sensor Platform (ESP) technology is the next logical step in the keyboard-mouse continuum. ESP technology allows users to interact with computers in ways that are more intuitive, dynamic and powerful. Ergodex, DX1, and Ergodex Sensor Platform are trademarks of Ergodex. Ergodex is privately held.

About ThinkGeek.com

ThinkGeek.com is the top retailer for the techno-enthusiast market and sells everything from fun gadgetry and computer accessories to apparel, and it is the number one online destination for caffeinated products from soap to hot sauce. Founded in 1999 to meet the gadget needs of the Open Source community-the thousands of programmers, engineers, students and lovers of Open Source out there who were in the trenches as the Internet was forged-the website now draws a wide cross-section of visitors and appeals to the geek in everyone. ThinkGeek.com is the e-commerce division of OSTG, the leading network of technology sites. (www.thinkgeek.com). ThinkGeek is a registered trademark of ThinkGeek, Inc., in the United States and other countries. All other trademarks or product names are property of their respective owners.
